JASON JAMES PHILIP

B.Tech Student in Information Technology • Software Engineer

+91 9961419157 | jasjames.11@gmail.com | Linkedin

Final-year IT student skilled in full-stack development and data science. Actively expanding knowledge across broader IT domains, including cloud computing, AI/ML and cybersecurity. Eager to broaden technical skills by contributing to diverse, real-world engineering projects.

EDUCATION

Rajagiri School of Engineering and Technology (RSET), Kerala, India

Bachelor of Technology in Information Technology | Minor in 3D Printing | CGPA : 8.21 (Semester 7) | Sep 2023 – Present

Methodist College Kuala Lumpur (MCKL), Malaysia

Cambridge A-Levels: Computer Science, Physics, Math, Economics | Aug 2021 – Mar 2023

Global Indian International School (GIIS), Kuala Lumpur, Malaysia

Cambridge IGCSE: Eng, Math, Chem, Phy, Bio, ICT, BST, Econs, AddMath | Sep 2015 – Jun 2021

EXPERIENCE

Full-Stack Development Intern | NeST Digital, Kerala, India | May 2026

- Built an AI-powered MERN application integrated with the Google Gemini API to generate personalized learning roadmaps based on user skill level, storing pathways and rendering interactive node graphs with curated resources.
- Gained hands-on experience implementing interactive web components, optimizing client-side asset loading, and handling media.

Physics & Maths Tutor | Hilla Community Center, Kuala Lumpur, Malaysia | September 2020 – April 2021

- Taught IGCSE Physics and Maths to around ten students for 8 hours per week at a UNHCR-aided school, focusing on conceptual clarity and applying concepts to problems.
- This targeted approach enabled the students to master the core material and achieve high academic grades.

Freelance IT Support | January 2022 – Present

- Strengthened problem-solving agility by troubleshooting real-world edge cases, managing changing project specifications, and delivering reliable, tested code.

PROJECTS

AI-Powered Intelligent Interview Agent

- Engineered a Google Meet side-panel copilot that transcribes interviews live using Deepgram and uses Gemini API to score candidates against the JD and resume, suggest follow-up questions, and flag resume contradictions and bias.

RAG-Based Document Assistant

- Built a retrieval-augmented generation (RAG) assistant on vector databases and LLMs, with a Gradio interface for querying documents.

Intelligent Learning Platform

- Developed a full-stack app that uses the Gemini API to generate personalized learning roadmaps with interactive visualizations and actionable learning resources.

Medication Management System

- Developed an offline-first Flutter application using SQLite and Android APIs to deliver a high-reliability medication management platform featuring Material Design 3 UI and additional adherence analytics.

3D-Printed Chess Board

- Collaborated on a team project using Autodesk Fusion 360 to design and create a custom 3D- printed chess board for our minor project.

Retail Inventory Management System

- Built a full-stack platform that scores expiry risk by batch and uses Gemini to generate discount, bundle and notification campaigns, with campaign performance tracking.

Hardware Communication Solution for the Blind

- Currently co-designing a braille-marked glove that consists of buttons for calls, messaging and other basic features paired with smart glasses for object detection and character recognition, integrating IoT and machine learning models to help the community.

RESEARCH

- Currently in the initial stage of the process to publish research findings in a Scopus-indexed IEEE journal, by conducting comprehensive literature reviews and establishing testing methodologies based on my project 'A Braille-Marked Smart Glove and Glasses-Based Communication Interface for Visually Impaired Users'.

TECHNICAL SKILLS

Programming Languages: Python, C, Java,
AI / ML: LLMs, RAG, NLP, LangChain, TensorFlow, Gradio
Full-Stack: React, Node.js, Express, REST APIs, JavaScript, PHP, HTML, CSS
Databases: MongoDB, Oracle, SQLite
Software Tools: Git/GitHub, MS Office 365, Autodesk Fusion
OS: Windows, Linux
Others: DevOps, Cybersecurity, Flutter, Arduino
Soft Skills: Quick learner, Problem solving, Project management
Spoken Languages: English, Malayalam, Hindi

CERTIFICATIONS

- IT Automation with Python – **Google**
- Power BI Data Analyst – **Microsoft**
- AI Engineering – **IBM**
- Oracle Cloud Infrastructure – **Oracle**
- Introduction to Cyber Security – **Cisco**
- Introduction to Linux (LFS101) – **Linux Foundation**
- Business Analytics & Text Mining with Python; NLP; Information Security; Introduction to Industry 4.0 & Industrial Internet of Things – **NPTEL**
- Supply Chain Management Fundamentals – **Blue Ocean Corporation**

ACHIEVEMENTS

- 1st Place in HACKS'US Edition V (national hackathon), software engineering track.
- Received annual academic excellence awards throughout school.
- Won several sports medals, including an individual championship trophy.

LEADERSHIP & VOLUNTEERING

- School Student Council Prefect
- College Football Club Secretary
- Volunteered as core committee for "**Git Started**" Workshop for GitHub fundamentals and **SWI{F}TF**, a cybersecurity Capture The Flag Challenge event
- Volunteered to organize & facilitate the **CONFLUENCE 3.0** event, India's largest Industry-Academia Summit

WORKSHOPS

- Participated in **DevFest Kochi 2025** & **Google Cloud Community Day Kochi 2026** hosted by Google Developer Groups.
- Selected for **GSSoC 2026**, contributing to open-source projects on real-world applications.
- Participated in two editions of **CONFLUENCE**, an Industry- Academia Summit to gain exposure to real-world technology and innovation ecosystems.
